

SUMMER WORKSHOP ANNOUNCEMENT!

July 18th and 19th

Dear Patients and Friends:

Last year we conducted patient trial studies and fittings on a new hearing aid that was launched by the manufacturer Oticon. Many of our patients benefited from the technological advances in the Opn chip. Oticon has now expanded the Opn chip to their low and mid level technology levels as well as in a power Behind The Ear product. Plus these products can now be rechargeable!

We are looking for patients to trial these devices.

An Oticon Audiologist will be present at the workshop and one lucky patient will receive a complimentary T.V. Streamer! Make your appointment today!

Please pass this letter along to a friend in need if you cannot attend.

Sincerely,
Evelyn Wiest-Kertz, M.S., CCC-A

Coupon

Negotiated Pricing for all levels of Opn Technology

Expires 7-10-2017

Coupon
